The Complete Top Biller

WARNING

To pass this course you have to demonstrate application of the content through a % revenue increase

12 weeks - Online with mentoring support

This is the only course on the market today where to become accredited you actually have to apply the techniques you learn and show an increase in your billings. Theory without action is useless so unless you take action you will never find yourself in the elite group of recruiters that become top billers.

This course is for anyone with over 18 month's recruitment experience who has an established client base and wants to know how to turn their desk into a consistently high revenue generating business. It applies to any recruitment sector, permanent or contract markets and is only suited to consultants managing both client and candidate processes.

The 12 units are:

1. **How to analyse your Business**, highlight strengths, weaknesses and build a meaningful Action to Plan to increase revenue
2. **How to develop 'cash cow's** and increase client commitment and engagement
3. **Recruitment Solution Selling** – how and when to sell solutions and handle client objections
4. **Be the 'Go to Person' in your market** – how to raise your profile in the market and network effectively to create opportunities
5. **Value based Selling** – how to create true value propositions and differentiate yourself from your competitors
6. **Advanced Communication & Influencing skills** – how to tailor your communication style to your audience and influence decision making processes
7. **High Impact Client Meeting & Sales Presentations** – how to plan, prepare and deliver client meetings and presentations that win you business
8. **Advanced Objection Handling** – how to overturn client decisions to win more placements
9. **Closing your Performance Gaps** – how to close performance gaps and handle motivation dips quickly and effectively
10. **Self Management** – how to manage yourself like a leader, be accountable and stay focussed on results
11. **Managing your Career** – how to set and achieve career goals, building career advocates and managing upwards
12. **Course Assessment** – measuring the return on investment. Can you demonstrate a % increase on your revenue in order to pass the IOR accreditation criteria?
